PROFILE

Founder of CodeXViber. I build modern websites, animated experiences, AI-powered tools, presentations, and creative technology — turning ideas into digital reality that is useful and visually memorable.

WHAT I BUILD

Website Development

Business websites, portfolios, and animated landing pages with React, Next.js, and Tailwind CSS.

Presentation Design

Pitch decks with a clear story and strong visual hierarchy.

AI Agent Solutions

Practical AI-powered tools and workflows that take repetitive work off the table.

Robotics & Automation

Connected components, automation experiments, and the technical setup that keeps products running.

SKILLS

Frontend & UI	HTML, CSS, JavaScript, React, Next.js, Tailwind CSS
Server-side	Node.js, API integration, Supabase, full-stack web development
AI & creative tech	AI-assisted development, AI-powered applications, website animation, UI/UX design
Presentations & tools	Presentation design, pitch decks, VS Code, Git, Figma

HOW I WORK

01 Idea	Talk through goals, audience, and scope.
02 Design	See the look and flow before any code.
03 Build	Fast, responsive, clean code with regular updates.
04 Launch	Go live, then stay for fixes and growth.

APPROACH

Fast delivery with clear milestones. Quality code: responsive layouts and care for the details. A visual direction tailored to each client. Long-term support for updates, maintenance, and the next phase.
